

Trade fair preview and invitation to an individual press talk

**Bergolin at WindEnergy in Hamburg
September 27-30, 2022**

Individual press talk at exhibition stand 510, hall B7

Osterholz-Scharmbeck, 01. August 2022. In 2022, WindEnergy Hamburg is an industry meeting with special significance for the leading companies from the onshore and offshore wind industry. Due to the ecological and political challenges of the recent past, wind energy is in the focus of public debate as hardly ever before.

As the market-leading full-range supplier for rotor blade coating, repair, maintenance and OEM, Bergolin offers its customers a product portfolio ranging from putty and filler to top coat and leading-edge protection. With its own branches and cooperation partners in all markets important for the production of rotor blades, the paint manufacturer provides service close to the user and supports individual process optimization. True to the motto "Naturally Strong", Bergolin's coating systems are characterized by their strong resistance to enormous strain under changing weather conditions, and enable operators to achieve an above-average length of operating cycles.

Dr. Matthias Otting, Managing Director at Bergolin, invites you to an individual press talk at WindEnergy. From September 27 to 30, we will be happy to present our trade fair highlights to you in a personal meeting at stand 510 in hall B7.

We look forward to seeing you at WindEnergy.

Bergolin GmbH & Co. KG

Bergolin GmbH & Co. KG was founded in 1909 and is a globally active company with headquarters in Germany. The company specializes in the development and manufacturing of high-quality individual coating systems and has a large product range for a wide variety of applications in the field of rotor blade production and maintenance. Bergolin has more than 20 years of experience in the repair and development of rotor blade coatings and offers the right system for every requirement, from gelcoat to leading edge protection. With over 100,000 coated examples for various OEMs, we are one of the world's most important suppliers in this market segment.

Our customers appreciate the partnership like cooperation with Bergolin. The experts at Bergolin develop solutions together with the customer that are

precisely tailored to individual requirements and processes. Customers benefit from optimized processes and longer service lives. With its subsidiaries in Poland, China, India and the USA, as well as a worldwide network of cooperation partners, Bergolin offers a high quality of service close to the customer.
